## SWELL® FOAMING HAND SANITIZER -- EP 804

When water is not available, there's no better way to kill the most common germs, including MRSA, VRE and E-coli, than **Swell® Foaming Instant Hand Sanitizer**. Also effective against the **H1N1 Flu Virus**. Schools, health care, and food service/ processing industries all benefit from this fast, convenient way to ensure clean hands.

### Swell® Foaming Instant Hand Sanitizer - NO ALCOHOL

**No water needed.** 0.2% Benzethonium Chloride (Quat-based) eliminates 99.9% of many important organisms. Non-flammable and dye free, with a light linen fragrance. End users love the convenient and popular foam.

H1N1 is a virus whose primary point of entry into the body is through the respiratory system. There is no one product that protects against the H1N1 virus. It is unlike MRSA, a bacterial infection that targets the skin.

As recommended by the CDC, the most effective way to keep H1N1 at bay when regular soap and water are not available is to use an Instant Hand Sanitizer. A non-alcohol (Quat based) hand sanitizer is effectively useful for killing flu germs on hands such as Epic Industries' Swell® Foaming Instant Hand Sanitizer.

Persons at most risk for H1N1 Swine Flu include children, elderly persons and pregnant women. Those businesses that are frequented by those groups in particular should offer **Epic Industries' Swell® Foaming Instant Hand Sanitizer** for their customers to use. In addition to fighting germs, having **Epic Industries' Swell® Foaming Instant Hand Sanitizer** available to the visiting public is good for public relations and public health. Business are now displaying their concerns for this upcoming flu season and showing their customers they care by providing this seasonal protection sanitizer and making it readily available to use to prevent against the spread of germs. Having **Swell® Foaming Instant Hand Sanitizer** available is one way to help ensure that businesses will also survive the flu season with minimal absenteeism due to sickness. Schools, day cares, hospitals, clinics, grocery stores, industrial plants, and public facilities are all ideal businesses that should stock up immediately for the cold and flu season.

For more information about H1N1 Virus go to the CDC website: [http://www.cdc.gov/swineflu/swineflu\\_you.htm](http://www.cdc.gov/swineflu/swineflu_you.htm)
